TECHNICAL SPECIFICATION

Application

- to create a line of light where the ceiling meets the wall

Assembly

- fixed in the gap between the wall and the ceiling using fixing glue

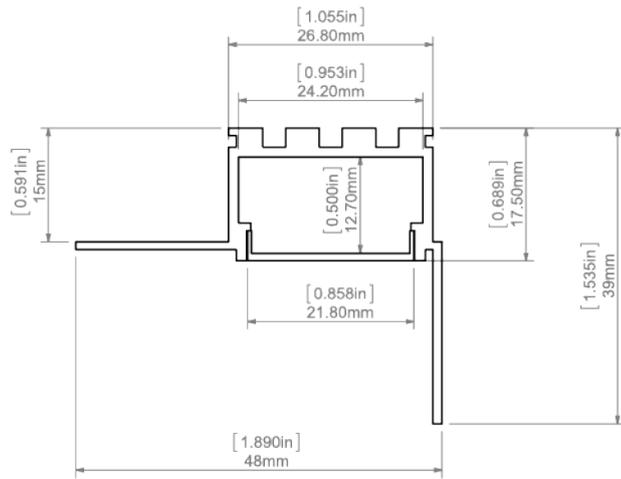

Additional information

- the profile fits in the thickness of two drywall panels
- after gluing the KOZUS-CR profile in the gap, its fixing "wings", which are in contact with the wall and the ceiling, should be covered with tuff-tape. This will prevent the exposure of cracks caused by the work of various materials
- the use of a standard mesh or non-woven fabric may be insufficient
- the KOZUS-CR profile can be fitted with the TECH-22 protective insert, which protects the inside of the profile from contamination during assembly

AVAILABLE LENGTHS

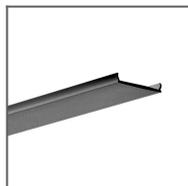

Ref. nr.	surface finish	available lengths
C0600NA_1	Non anodized (raw)	1000mm
C0600NA_2	Non anodized (raw)	2000mm
C0600NA_3	Non anodized (raw)	3000mm
